

Cotton::Builtin::ArrayInstance
::copy

Cotton::Builtin::ArrayInstance
::getSize

Cotton::Builtin::ArrayInstance
::ArrayInstance

```
graph LR; A["Cotton::Builtin::ArrayInstance::copy"] --> C["Cotton::Builtin::ArrayInstance::ArrayInstance"]; B["Cotton::Builtin::ArrayInstance::getSize"] --> C;
```

The diagram illustrates a relationship between two source methods and a target class. On the left, two white rectangular boxes with black borders contain the text 'Cotton::Builtin::ArrayInstance::copy' and 'Cotton::Builtin::ArrayInstance::getSize'. On the right, a gray rectangular box with a black border contains the text 'Cotton::Builtin::ArrayInstance::ArrayInstance'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both methods are associated with or point to the 'ArrayInstance' class.
